Maintenance Control Center

[Home](#) > [Printer-friendly PDF](#) > Maintenance Control Center

The Maintenance Control Center (MCC) is the nerve centre of the Line Maintenance organization; it is responsible for keeping track of all Oman Air fleet in operation.

The MCC keeps track of all Oman Air fleet and co-ordinates with key units throughout the operations, maintenance and engineering activities so that maintenance, when needed, can be planned, co-ordinated and expedited to minimize delays and down time.

The MCC locates and dispatches the necessary personnel within the company who can provide whatever maintenance, trouble-shooting, or parts assistance that is needed to support the operational phase of the activity.
